FOOD SAFETY POLICY

We are committed to process milk received from apex co-operative societies in a clean and hygienic environment adhering to Good Manufacturing Practices (GMP) and Food Safety management system

By adopting accepted and appropriate methods and technology in procurement, processing, manufacturing packing and prompt delivery of milk and milk products and will undertake -effective internal / external communication to improve the standards of hygiene, safety & quality, food fraud control and food defense in the final product across supply chain

We are committed to:

- Ensure safe to consume milk products conforming to standards by following Food Safety Management System in our activities
- Improve the standards of hygiene, safety & quality, food fraud control and food defense in the final product of the food chain and will undertake effective internal / external communication
- Meeting all statutory and regulatory requirements related to food safety in all our activities
- Ensure mutually agreed food safety requirements of our customers
- Communicate food safety aspects both internally and externally parties
- Continually review and update our Food Safety Management System
- Upgrade training and competencies related to food safety as per FSSAI & FSMS

Managing Director
